The target record

One object per entry: surname, given_names, birth_year (only if printed), education (the "ed." string), honours (each with its award year if printed in parentheses), events, terminal (retired, resigned, died: year).

One event per distinct posting: position as printed, place as printed (or inherited from the previous clause), year_start, year_end, is_acting, civil or military.

Three decisions

- A clause with no place: does it inherit the previous one? (“do.” in entry 2.)
- “col. sec. and min. of com. and lab., 1906”: one event or two?
- “KT. BACH. (1920)”: one honour with a year, two honours, or a title that is not an honour?
